

IMPORTANT INFORMATION FROM TROPIC SUN TOWERS

Hurricane season starts June 1st and ends November 30th every year. Since the 2008 hurricane projections are expected to be well above average, with 15 named tropical storms and 8 expected to intensify into hurricanes the east coast has a 70% likelihood of a major hurricane.

As most of you are aware the 2004 hurricane season closed the resort for 10 months. In an effort to prepare the property for all upcoming hurricane seasons, your board of directors has decided to protect the property by having hurricane shutters installed. This project will begin the first part of June and is projected to end late July or early August.

Every unit will need to be entered in order to complete the installation, so we are asking for your cooperation and understanding during this project. We will be doing as much of the work possible from an outside swing stage in order to minimize the time needed in each unit. When the shutters are installed on the east side of the property it will be necessary to close part of the pool/sundeck areas. We will do our best to minimize the interruptions, however, this project must be completed as soon as possible in order to be ready for any storms in the future.

We do appreciate your understanding and patience during this project.

Should you have any questions please feel free to contact the resort at 386-672-4611.

**Sincerely,
Management**
